# ADA Colorado Sand 2kg

**Availability:** 1

## Price: R395.00

**Description**

ADA Colorado Sand 2kg is a high-quality natural cosmetic sand designed for aquascaping and planted aquarium setups. With its warm, earthy tones, Colorado Sand brings a natural riverbed look to your layout, enhancing the visual appeal of your aquascape. It’s perfect for foreground use or accenting specific areas to create contrast with darker substrates.

This sand is inert, meaning it won’t alter water parameters, making it safe for delicate aquatic plants and livestock. ADA’s premium quality ensures a clean, uniform grain size that allows for smooth scaping and natural water flow.

Whether you’re creating an Iwagumi layout or a lush nature-style tank, ADA Colorado Sand adds depth, warmth, and authenticity to your aquascape.
