

Chihiros CO2 Regulator Pro With Solenoid And Single Bubble Counter

Price: R2,899.00

Description

The Chihiros CO2 Regulator Pro is a premium-grade CO2 delivery system designed specifically for planted aquarium setups. Built with high-quality components, it features a precision needle valve, integrated solenoid valve for timer compatibility, and a single bubble counter for accurate monitoring.

This Dual Gauge Regulator can be expanded to run multiple tanks by adding more manifold blocks which are sold separately.

Dual gauge can check the pressure in the CO2 cylinder and working pressure, safer and more reliable.

Whether you're a beginner or a professional aquascaper, this regulator ensures consistent CO2 output to support healthy plant growth and stable pH levels in your tank.

Perfect for aquascaping enthusiasts who demand precision and reliability in their CO2 setup.
