Description

The Multi Colour Half Moon Double Tail Betta is a true showstopper in any aquarium. Its eye-catching coloration blends a spectrum of hues — from blues and reds to hints of gold, white, or even green. What sets this fish apart is the impressive half-moon tail paired with a double-lobed fin structure, creating a flowing, symmetrical and elegant appearance. Perfect for betta lovers looking for a striking centrepiece fish.

While they can tolerate cooler water and live in tanks without heaters, the very cold winters in South Africa can be tough on them. Providing a heater during colder months helps maintain stable, warmer water temperatures — leading to healthier and happier fish.

Bettas thrive on a high-protein diet. Feed them quality betta pellets, frozen foods like bloodworms, daphnia, and brine shrimp to support vibrant color and overall health.

Adding supplements like Seachem Garlic Guard and Azoo Discus Vitamins to your betta’s diet can help boost immunity, improve appetite, and keep your fish in peak condition. These extras, combined with a balanced high-protein diet, go a long way in supporting your betta’s overall health and vibrancy.
