UNS Controsand Santa Fe 3L

Availability: 2

Price: R230.00

Description
Ultum Nature Systems Controsand is a thoughtfully designed line of decorative substrates made for planted aquariums and nature-inspired aquascaping

A beautiful gravel that draws inspiration from natural riverbeds and streams. Santa Fe's rich mix of cool grey and earthy hues provides a unique look that is ideal for accent use or biotope aquariums.

Santa Fe Controsand features a distinctive blend of light and dark pebbles in a larger grain size, drawing inspiration from sediment commonly found along natural riverbanks. Its mix of cool and warm tones, combined with varied pebble sizes, makes it an excellent choice for biotope-style aquascapes or as a naturalistic accent to more uniform base substrates. Santa Fe enhances visual depth and pairs beautifully with brightly colored aquatic plants and livestock.

Ideal for both beginners and experienced aquascapers, Santa Fe Controsand is easy to use—just rinse gently to remove fine particles, then place strategically in your aquascape as a decorative, nature-inspired feature.

Approximate Grain Size: 3 ~ 5 mm

Important Note: Santa Fe Controsand may alter water chemistry by increasing hardness.
