UNS Controsand Tahoe 3L

Availability: 2

Price: R230.00

Description
Ultum Nature Systems Controsand is a thoughtfully designed line of decorative substrates made for planted aquariums and nature-inspired aquascaping

A rounded pebble gravel designed for freshwater planted tank use. Its neutral color palette is versatile and makes it suitable for a range of popular aquascaping styles. Tahoe works well alone or combined with other cosmetic sands to create a custom blend for the aquarium, terrarium, paludarium and more.

Tahoe Controsand features rounded, natural gravel in a neutral color palette, offering maximum versatility for a wide range of aquascaping styles. Whether used on its own or combined with finer sands, Tahoe serves as a subtle yet effective accent or base layer in freshwater aquariums, terrariums, and paludariums.

Simple to prepare and easy to use, Tahoe is well-suited for aquarists of all levels. Just rinse thoroughly to remove finer dust, then distribute across your aquascape to add texture and a naturally balanced tone.

A blend of neutral-toned pebbles that complement most aquascaping styles—ideal for accenting darker or finer substrates, and enhancing the colors of plants and livestock.

Approximate Grain Size: 3 ~ 5 mm

Important Note: Tahoe Controsand may alter water chemistry by increasing hardness.
