Oase Crystalskim 350

Availability: 1

Price: R1,119.00

Description

The CrystalSkim Surface Skimmer from Oase ensures a crystal clear surface. The unobtrusive and shapely design of the surface skimmer makes it ideal for use in a wide variety of aquariums. The skimmer can be individually adjusted to the respective needs and reliably removes residues in the aquarium.

The Oase Crystalskim helps to remove both biofilm and duckweed. The Oase Crystalskim skimmer quickly and effectively frees the aquarium surface of the aquarium from floating substances such plant remains and, of course, from annoying biofilm.

A thick biofilm makes gas exchange more difficult – with the CrystalSkim, this situation can be significantly improved for the good of all aquarium inhabitants.

After aquarium plants are trimmed, the skimmer conveniently catches even the finest plant fragments, which are easy to miss with a dipping net.

The discreet, compact and modern design of the skimmer helps it fade into the background.

An integrated collection basket ensures the safety of the aquarium inhabitants by making sure they can never get into the skimmer. This can also be removed if desired.

The Oase Crystalskim is easy to install, energy efficient and maintenance is

straightforward.

Max. flow rate - 300 l/h

Power consumption - 4,5 W
