

AquaClean AC Phosphate Remover Pro 500ml

Price: R240.00

Description

Aqua Clean Phosphate Remover is a high-performance iron-based synthetic granular media designed to rapidly and effectively remove phosphates and silicates from aquarium water. With superior binding capacity and high porosity, it delivers faster results and longer-lasting performance than most competing products—helping to maintain clear water and a healthier aquatic environment.

Powerful Phosphate & Silicate Removal - Binds phosphates and silicates efficiently to help control algae growth

High Binding Capacity – Exceeds many competing products by over 50% in removal rate and capacity

High Porosity & Surface Area - Maximizes contact with water for rapid and effective filtration

Non-Leaching Formula – Once bound, phosphates and silicates will not be released back into the aquarium

Safe & Reliable – Suitable for continuous use in properly managed filtration systems

Rinse media lightly before use to remove fine dust

Place in a filter media bag in an area of good water flow

Aqua Clean Phosphate Remover offers exceptional efficiency, durability, and peace of mind. Its strong binding performance, non-leaching design, and versatility make it an ideal solution for aquarists looking to control algae, improve water clarity, and maintain stable water chemistry in both freshwater and marine systems.

Suitable for both freshwater and saltwater aquariums.

Lifespan depends on phosphate levels and tank bioload.

Size: 500ml, treats approximately 500L
