# Seachem Reef Phosphorus 250ml

**Availability:** 1

## Price: R230.00

**Short Description**
Phosphorus Supplement for the Reef Aquarium. Supports Growth and Coloration.Concentrated 3,500 mg/L Phosphate.

**Description**
Phosphorus is an essential element required in metabolic processes, protein synthesis, and growth of corals and macroalgae. It is important to maintain phosphorus levels along with nitrogen levels in order to allow for optimal growth and coloration of corals and macroalgae.

Supplementing with Seachem Reef Phosphorus provides a targeted means of increasing phosphorus concentrations effectively without also adding dissolved organics.

Supplementing with Seachem Reef Phosphorus provides a targeted means of increasing phosphorus concentrations effectively without also adding dissolved organics.

Ideal phosphorus levels will vary but generally range from 0.02 - 0.05 mg/L phosphate. Seachem Reef Phosphorus contains 0.117% elemental phosphorus. Use Seachem’s Reef Nitrogen to achieve a balance of nitrogen and phosphorus levels for optimal results.
