Two Little Fishies AcroPower 250ml

Availability: 2

Price: R386.00

Description

Use AcroPower from Two Little Fishies to provide amino acids to your corals to help build their skeletal structure. Amino acids can easily deplete in reef aquarium systems through protein skimmers and ultra low nutrient systems. Replenish amino acids for colorful and healthy corals.

Specifically formulated for SPS corals.

Amino Acids are required by corals to help aid in the process of breaking down food, helping produce necessary energy. Acropower is a blend of specific amino acids that will assist the development of their skeletal structure along with noticeably increased coloration within days.

Shake well, then add the desired amount to a high flow area of the tank for rapid dispersion. Dose 5 mL per 25 gallons (94.6 L) once per week.
