Hygger Mini Pro Aquarium Heater HG031 10w

Availability: 2

Price: R630.00

Description

Thumb-sized mini portable heater is ideal for nano tanks, it is easy to hide in the tank corner or behind aquatic plants, the auto shut-off function and real-time temperature monitor are safe for small fish. It is suitable for fresh & marine water, fish, or turtle tanks.

The hygger 10w HG031 aquarium portable heater is designed for small glass or acrylic tanks with a capacity of 3.8L to 19L making it suitable for freshwater and marine environments. It ensures that your aquatic pets are kept in the optimal temperature range of 59-93°F (15-34°C). The temperature display can be easily switched between ? and ? to accommodate your preference.

Retains your temperature settings even after power outages.

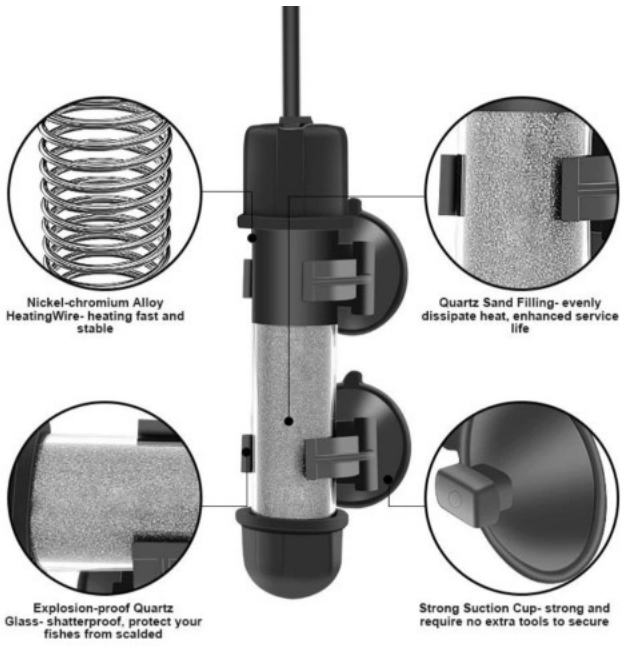

The hygger HG031 aquarium portable heater is designed for small glass or acrylic tanks, making it suitable for freshwater and marine environments. It ensures that your aquatic pets are kept in the optimal temperature range of 59-93°F (15-34°C). The temperature display can be easily switched between ? and ? to accommodate your preference.

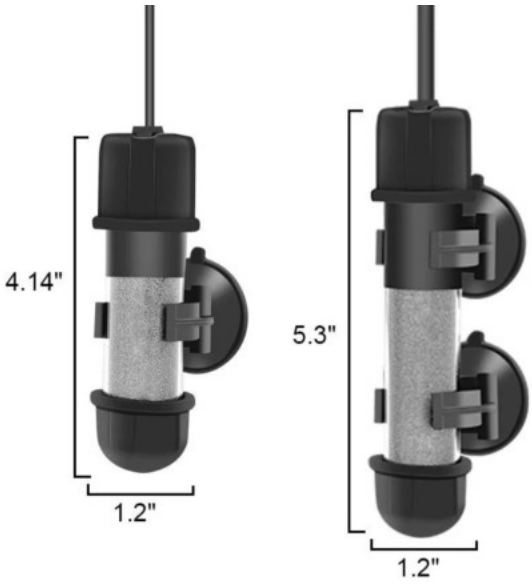

The hygger aquarium mini heater is crafted from 2 mm-thickened quartz glass, offering a robust and reliable heating solution. The quartz heating rod is designed to resist explosion, corrosion, and insulation. This material ensures durability and protects against accidental damage from the inhabitants, such as punching or scalding.

Before cleaning or changing the water, ensure the power is unplugged and the heater is removed from the aquarium to prevent electrical hazards.

Product Gallery

Heater should be fully sumberged into water and installed on tank inner side.
