Dymax UV-FLO 5w 12/16mm

Availability: 3

Price: R755.00

Short Description
Hose Compatibility: 12mm

Description
DYMAX UV-FLO 12/16mm (12mm) is a quick connect in-line UV steriliser designed to easily attach along any water hose including canister filter, overhead filter and even along a return pump hose from a sump filter. This UV steriliser is perfect for both freshwater and saltwater aquariums. It efficiently eliminates algae spores, harmful bacteria, and parasites, ensuring a healthier environment for your aquatic life.

This product helps purify water by removing chemicals, eliminate algae in water, eradicate suspected bacteria that could contribute to cloudy water, green water and diseases, respectively.

Besides having multiple contributions for water purification the 5W UV-FLO has also a unique condensed design that redirects water to flow through and around the bulb to maximise contact time for optimum water clarification.

Purify aquarium water

Prevent algae growth

Remove green water

Eradicate suspended bacteria

Quick and easy installation

Energy Efficient

How to Use

Connect the Dymax UV-FLO in- line using the 12/16mm hose fittings.

Position it vertically

Power On to activate the UV sterilisation process.

Monitor water clarity and enjoy a healthier, cleaner aquarium.

Hose Compatibility: 12mm

Perfect for hobbyists looking to maintain a clean, balanced, and visually stunning aquarium environment.
