Description
Dymax Prebiotic Bottom Feeder Elite – Premium Sinking Mini Wafers

Dymax Bottom Feeder Elite delivers a protein rich nutritionally balanced all-vegetable diet that is high in fibre. This food is formulated from a nutritious blend of ingredients including shrimp that contains a stabilized form of vitamin C and antioxidants to help support a healthy immune system that keeps the fish well.

To keep the aquarium water clean, the food is designed not to leach colour as well as made a reasonable size for fish to finish eating quickly without nibbling for a long period of time.

Catfish, Plecostomus, Loaches, Corydoras, Ancistrus, Otocinclus and other fish love this incredible food which has been made to satisfy their instincts and dietary needs.

Spirulina and Astaxanthin added to improve fish colour.

Suitable pellet size for quick consumption of food.

Include shrimp and vegetables.

Highly digestible formula.

Pellet Size - 1.6mm

Garlic Extract Added

Important Feeding Instructions:

Offer only as much as fish can consume in 2–3 minutes

Remove uneaten food to maintain water quality
