NTLABS AxoStart 100ml

Availability: 2

Price: R238.00

Description

Created for Axolotl aquariums, a live culture of filter bacteria to help breakdown Axolotl waste.

When to use:

If left, Axolotl waste will build up and become toxic. AxoStart is a colourless, pure blend of friendly filter bacteria that will break down Axolotl waste.

By detoxifying ammonia and nitrite into safer nitrate, AxoStart makes the water safe for Axolotls.

Add to a new aquarium to help ‘kick-start’ the filter, when adding new Axolotls, after a filter clean/water change, or at any signs of stress.

Use alongside AxoSafe Tap Water Dechlorinator during your regular maintenance routine.

Shake bottle thoroughly before use.

Bacteria starts working immediately, improving the performance of the filter.

Repeat dose weekly for 4 weeks when starting a new aquarium or a single dose after each

water change.

AxoSafe, AxoCure and AxoTonic were named best new indoor products at PATS 2024! Judges said: "There will be huge demand for this product. It’s well branded and is excellent value for money. It’s a great addition to the range."
