

NTLABS AxoSafe 100ml

Price: R205.00

Description

Created for axolotl aquariums, removes chlorine, chloramine & heavy metals, reduces stress

When to use:

Award winning AxoSafe removes chlorine, halogens, chloramine and heavy metals found in tap water, which are toxic to Axolotls. AxoSafe is a colourless, pure dechlorinator which is free from aloe vera making it safe for use when Axolotls are present.

Use when filling a new aquarium and when adding fresh tap water i.e. during a water change. Also use when moving an Axolotl from one place to another: simply add to the transport bags.

Use alongside AxoStart Filter Bacteria to help 'kick-start' the filter, when adding new Axolotls, after a filter clean/water change, or at any signs of stress.

Shake the bottle thoroughly before use.

Mix required dose in the new water before adding it to the aquarium.

Add slowly to aquarium.

Product works immediately to remove chlorine and chloramines from tap water.

AxoSafe, AxoCure and AxoTonic were named best new indoor products at PATS 2024!
Judges said: "There will be huge demand for this product. It's well branded and is excellent value for money. It's a great addition to the range."
