

Azoo Plus Ultra BioGuard 120ml

Price: R230.00

Short Description

Special probiotics that can quickly decompose nitrous acid, ammonia, nitrates, hydrogen sulfide and other harmful substances. (120ml)

Description

Special probiotics that can quickly decompose nitrous acid, ammonia, nitrates, hydrogen sulfide and other harmful substances.

It can further purify water, filter organic matter, biological waste, uneaten food, other pollutants and reduce the growth of algae.

Proprietary technology allows long term preservation of various microbial strains to maintain their optimal activity and efficiency. Allowing them to continue to grow over

time to gradually give the product a darker colour and their decomposition capacity is further enhanced.

The strains have good tolerance and are highly active in all sorts of environments.

It may be applied directly to dry aquarium gravel or filter media and activated once in water.

Numerous highly Active bacillus and lactobacillus strains provide over 95% inhibition effect against vibrio vulnificu, escherichia coli, salmonella enterica, greatly reducing the chance of fish disease and infection for improved survival.

Our advance fermentation technology gives the strains a sweet smell plus special purple non sulfur bacteria to remove sulfur and Nitrogen impurities to rapidly get rid of odor.

Abundant probiotics with cell diameter up to 10 um. They can be used directly to feed juvenile shrimp and fish or be added to food of ornamental organisms. Quickly establishing themselves as the dominant intestinal species, they help with digestion, improve the survival rate and boost the immune system.
