Description

The Small Synodontis Catfish is a fascinating and hardy bottom-dweller native to Africa's freshwater rivers and lakes. Known for their unique upside-down swimming behavior, they make excellent additions to African Cichlid tanks or Other Cichlid Tanks. These catfish are nocturnal, spending most of their time hiding during the day and scavenging at night. With their bold patterns and active personalities, Synodontis catfish bring both function and flair to any freshwater setup.

Origin: Africa – primarily the Congo Basin and Nile River systems

Diet: Omnivorous – enjoys sinking pellets, algae wafers, frozen bloodworms, brine shrimp, and vegetable matter

First Discovered: Various Synodontis species were cataloged during the 19th and early 20th centuries

Care Level: Easy – requires stable water parameters and hiding places.

Size: Typically grows to around 10–15 cm (4–6 inches) depending on the species.
