

JBL C02 KIT PRO Flora m 501

Call for Price: 011 826 5887

Description

CO2 fertiliser system for the best feeding of fast and slow growing plants in freshwater aquariums up to 400 l

Assemble system, attach diffuser in the aquarium and adjust CO2 supply until the permanent test indicates the ideal value

Professional water care: precise dosing due to pressure reducer. Even release. Effective distribution due to extendable diffuser. Best check of CO2: bubble counter with magnifying part and CO2/pH test. Residual pressure display on pressure gauge

TÜV tested storage cylinder, pressure cylinder with overpressure relief, stand ensures cylinder does not fall over. Hose screw connection prevents hose from slipping, check valve prevents water entering the cylinder

Package contents: refillable 500g CO₂ cylinder, fitting, stand, pressure reducer, diffuser JBL Taifun 27 cm, bubble counter, 3 m special hose, backflow stop, CO₂/pH permanent test
