Short Description

300ml

Description

This product is specially formulated to provide essential iron, nitrogen, magnesium and other micronutrients that help to enhance the colour of plants as well as to accelerate rapid plant growth. The Iron Essential is the supplement that aquatic plants need for vigorous growth and healthy leaves & roots that contains no phosphates to cause unwanted algae growth. This supplement can also be used simultaneously with other Dymax Flora Plus & Dymax Ultra Black Water that will help to accelerate cell division and stimulate quick absorption of root system.
