  (at an authorized dealer or corresponding CO2 refilling stations)
- Disposable system with recyclable bottle
- Made in Germany

The Eheim CO2 Set 400 is ment for aquariums up to 400 litres

The Eheim CO2 Set 400 is a reusable system with a refillable bottle.

Aquarium water usually contains too little carbon dioxide (CO2) as it has already been extracted from the tap water at the waterworks. In addition to light, nitrogen, phosphate and trace elements, etc., the most important nutrient for aquarium plants is CO2 and, the stronger and healthier the plants, the less chance algae has to grow. Plants also produce more of the oxygen that fish need to breathe and CO2 also regulates the pH values in the water, when dosed correctly.

The Eheim CO2 Set 400 comes with a CO^2 reusable bottle (500 g) with a stand

- Precision pressure reducer with manometers and precise dosing valve for reusable systems
- 360° rotating hose connection
- CO2 specific safety hose, pressure resistant, 3m, Ø 4/6 mm
- CO^2 safety diffuser including bubble counter and non-return valve for effective CO^2 dosing
- CO^2 long-term test and indicator reagent for permanently measuring of the CO^2 content in the aquarium
- Bottle with standardised connection for refilling (at the specialist dealer)
- Safe and tool free installation
- Made in Germany
