

# Eheim CO2 Set 400

**Price: R4,400.00**

## Short Description

CO2 Kit For Planted Aquariums

## Description

The Eheim CO2 Set 400 comes as a complete set and includes all essential accessories needed for immediate use

- Safe tool-free installation
- Effective and precise CO2 dosing
- Permanent measurement of CO2 content in the aquarium
- Special components ensure high safety standards
- Reusable bottles with standardized connection for refilling  
(at an authorized dealer or corresponding CO2 refilling stations)
- Disposable system with recyclable bottle
- Made in Germany

The Eheim CO2 Set 400 is meant for aquariums up to 400 litres

The Eheim CO2 Set 400 is a reusable system with a refillable bottle.

Aquarium water usually contains too little carbon dioxide (CO<sub>2</sub>) as it has already been extracted from the tap water at the waterworks. In addition to light, nitrogen, phosphate and trace elements, etc., the most important nutrient for aquarium plants is CO<sub>2</sub> and, the stronger and healthier the plants, the less chance algae has to grow. Plants also produce more of the oxygen that fish need to breathe and CO<sub>2</sub> also regulates the pH values in the water, when dosed correctly.

The Eheim CO<sub>2</sub> Set 400 comes with a CO<sub>2</sub> reusable bottle (500 g) with a stand

- Precision pressure reducer with manometers and precise dosing valve for reusable systems
- 360° rotating hose connection
- CO<sub>2</sub> specific safety hose, pressure resistant, 3m, Ø 4/6 mm
- CO<sub>2</sub> safety diffuser including bubble counter and non-return valve for effective CO<sub>2</sub> dosing
- CO<sub>2</sub> long-term test and indicator reagent for permanently measuring of the CO<sub>2</sub> content in the aquarium
- Bottle with standardised connection for refilling (at the specialist dealer)
- Safe and tool free installation
- Made in Germany
