Availability: Out Of Stock
Call for Price: 011 826 5887

Description
Compact and reliable quality.

Preset temperature.

High quality heating element.

For marine & fresh water aquarium.

Fully submersible.

High accuracy: ± 2°C

Make sure the product voltage is consistent to the local one.

IMPORTANT

Before removing heater from aquarium, disconnect from electrical outlet and allow heater to cool in aquarium for 15 minutes.

The heater should NEVER be connected to an electrical outlet while out of the aquarium.

Aquarium water level should never be allowed to drop below indicated “water line” inside tube. These actions constitute misuse and may result in overheating damage to heater and environment.

For household use only.

25 Watt ~ 25 Liters/6.5Gal
