

Hikari Coralific Deliet 35g

Price: R165.00

Description

Ideal For Direct Fed Coral

A Nutrient Package That Stimulates Feeding Response.

Helps Offer Excellent Polyp Extension.

Offers Maximum Feeding Flexibility As A Targeted Gel Feeding Option.

A Zooplankton Replacement.

Helps Accelerates Coral Growth.

Hikari Coralific Delite is a revolutionary diet, specifically developed for corals and their unique nutritional needs, offering two modes of feeding: "Targeted Gel Feeding" directly on the mouth of a specific coral or "Squirt & Go™ Feeding" which allows the coral polyps to capture the food in the water column like they would zooplankton.

Contains necessary nutrients inverts require, specifically: trace elements, proteins, vitamins and astaxanthin for vibrant coloration.

Physical properties that are similar to floating zooplankton. Unlike other powder-type foods, Hikari Coralific Delite will not dissolve rapidly or cloud your aquarium water.
