Description

World's First Sponge-Like Monster Stick Food

A Scientific Diet For Larger Arowana & Top Feeding Monster Carnivores.

Ideal for Monster Fishes

- More Balanced Nutrient Profile Than Live Foods
- Extremely Flavorful, Color Enhancing Diet
- Floating Protein-Rich Stick

• FEATURES

- A jumbo stick developed to simulate fish normally fed live foods that will completely satisfy their hunger.
- The shape and makeup of this stick is unique in that it will absorb water quickly and take on the pancake-like consistency of a live food while retaining its visually desirable shape.
- Advanced research and bio-technology allow us to make this highly nutritious diet which supports rapid growth, proper form and vibrant coloration.
- No risk of contamination from harmful parasites or bacteria common with live food feeding.
- Finally a large sized stick that efficiently provides the required energy for the biggest eaters (see chart below).
