Description

Micro Pellets

A Uniquely Balanced Diet For Tetras, Barbs And Other Small-Mouthed Tropical Fish.

Small, Multi-Colored Pellets Designed Specifically For Small-Mouth Fishes, Providing Them Superior Nutrition With Excellent Digestibility. Great For Tetras, Barbs, and Other Small-Mouth Tropical Fish Providing Outstanding Value Versus Flakes.

FEATURES

- Our unique "Micro Coating" eliminates nutrition loss and water clouding.

- The premium-select marine & vegetable protein mix is ideal for small tropical fish who require larger energy reserves.
- A balance of Krill and Spirulina offers vivid coloration.
- This precisely colored granule improves underwater visibility thereby resulting in more rapid acceptance with less uneaten food.
- A softer texture that's ideally suited for most smaller community tank fishes.
