

Hikari Mini Algae Wafers

Call for Price: 011 826 5887

Description

A Scientific Diet For Plecostomus And Other Algae Eating Fishes, Including Marine Herbivores

Ideal for Most Herbivores.

FEATURES

- Perfect size for small-mouthed herbivores.
- A perfect balance of premium-select ingredients developed to promote proper growth and desirable form in most herbivorous species.
- Contains higher levels of vegetable matter and multiple algae that plecostomus and other algae eaters prefer.

- Great for all types of vegetable eaters including fish, snails and crustaceans.
- The uniquely shaped disc sinks rapidly and retains its shape allowing less aggressive species ready access to its nutrition.
- Contains pure-cultured spirulina and chlorella algae to help your underwater friends look their best, always.
- Trust the Hikari brand to assure your aquatic pets are getting the original and proven [Algae Wafers](#)™ formulation!
