Description

The Multi Colour Crowntail Betta is a spectacular addition to any aquarium, featuring bold, mixed colours across its body and flowing, spiky tail. Each fish is uniquely patterned with a blend of reds, blues, purples, and whites, making no two fish alike. The signature crowntail fin structure gives this betta an edgy, dramatic appearance that stands out in any tank.

While they can tolerate cooler water and live in tanks without heaters, the very cold winters in South Africa can be tough on them. Providing a heater during colder months helps maintain stable, warmer water temperatures — leading to healthier and happier fish.

Bettas thrive on a high-protein diet. Feed them quality betta pellets, frozen foods like bloodworms, daphnia, and brine shrimp to support vibrant color and overall health.

Adding supplements like Seachem Garlic Guard and Azoo Discus Vitamins to your betta's diet can help boost immunity, improve appetite, and keep your fish in peak condition. These extras, combined with a balanced high-protein diet, go a long way in supporting your betta's overall health and vibrancy.
