

MicrobeLift Nite-Out II

Call for Price: 011 826 5887

Description

Specially Formulated for Rapid Ammonia and Nitrite Reduction

Decreases Ammonia & Nitrite Toxicity

For SALT & FRESH WATER

Contains: Nitrosomona and Nitrobactor

MICROBE-LIFT/Nite-Out II is designed specifically for aquarium waters that contain marine life. Its highly-specialized microbial consortium of nitrifying cultures are specially formulated to eliminate ammonia via a natural biological process termed nitrification. The cultures contain in MICROBE-LIFT/Nite-Out II will establish, promote or stabilize and maintain nitrification in aquarium waters, eliminating the toxic effect of ammonia. MICROBE-LIFT/Nite-Out II liquid nitrifying bacteria contains select strains of Nitrosomonas and Nitrobacter. Nitrosomonas oxidize ammonia to nitrite and Nitrobacter oxidize nitrite to nitrate.

MICROBE-LIFT/Nite-Out II comprises select microorganisms that are autotrophic – able to use carbon dioxide as the sole source of carbon – and are relatively slow growing, requiring specific conditions for optimum growth with typical cell divisions rates from 8

to 16 hours. Their performance and rate growth is impacted by the environmental parameters required for nitrification.
