Short Description
Porous pumice-based biological filter media in a 2L pack. Enquire with Wazeer's Aquariums for product advice, availability and price.

Description
Bio Rio 2L is biological filter media made mainly from porous pumice stone. The textured surface provides space for beneficial bacteria to colonise within your aquarium filter.

Product details

- **Pack size:** 2 litres.
- **Media type:** biological filter media.
- **Main material:** porous pumice stone.
- **Purpose:** support beneficial bacterial colonies as part of the filtration system.

Choosing filter media

Check your filter model, media compartment and manufacturer guidance when planning a media change. Ask Wazeer's Aquariums for advice on the media and quantity suited to your setup.
