AquaClear Hang On Filters

Availability: Out Of Stock
Call for Price: 011 826 5887

Short Description
AquaClear Hang On Filter 20, 30, 50, 70 & 110.

Description
Aqua Clear Hang On Filter

Stock levels may Cary depending on availability and demand. If not in stock, stock can be ordered if available from supplier.

The revolutionary motor technology featured a single moving part—a free-floating magnetic impeller designed to provide superior wear-resistance and service life.

Floating inside a magnetic field, the magnetic impeller produced less heat, friction and wear. The breakthrough design made conventional filters with multiple moving parts obsolete. The invention was significant because it meant longer product life, consistent performance, and less energy consumption.

Patented Flow Control

With flow control, AquaClear allows users to adjust water flow to a specific aquarium volume or type. This provides flexibility in a variety of situations, such as when fish require more or less water movement and during feeding. Flow control reduces flow

intake by as much as 66% without compromising filtration efficiency.

Refiltration System

When reduced flow is selected, AquaClear's patented refiltration system re-circulates water through the filter media to maximize filtration performance through increased media contact time. Up to 50% of the water in the filter chamber is processed many times to produce a biologically stable, clean and healthy aquarium.

Efficient Design

AquaClear filtration extracts the full potential of the filter container, ensuring that the entire filter volume is used. The filter media baskets maximize filter media capability. They also prevent water by-pass and allow easy removal and installation of filter inserts. Water returns to the aquarium via a natural waterfall design to ensure efficient water distribution and surface movement for optimum oxygenation.

Flexibility and Filter Output

AquaClear can be used with any type of filter media, which can be interchanged and placed in custom configurations without disrupting the biological stability of the filter.

AVAILABLE SIZES

* Aquaclear 20 Power filter, 76 L

* AquaClear 30 Power Filter, 114 L

* AquaClear 50 Power Filter, 189 L

* AquaClear 70 Power Filter, 265 L

* AquaClear 110 Power Filter, 416 L
